

## What we offer

- Automation Support & Services

We specialize in complete PLC, HMI, and SCADA programming and development

- SPM (Special Purpose Machines)

Design and manufacturing of custom-built machines tailored for specific applications to maximize productivity and efficiency

- Maintenance & Field Services

On-site support for electrical control panels and automation systems

- Electrical Products Sales

We supply a wide range of high-quality industrial electrical items

**INCANDESCE**

### Why choose us?

- ✓ *Industry Expertise*
- ✓ *Customized Solutions*
- ✓ *Timely Delivery & Support*
- ✓ *Competitive Pricing*
- ✓ *End-to-End Services*

**INCANDESCE AUTOMATION**

**"Complete Solutions for  
Automation, Control & Custom  
Machinery"**

Who we are?

*At Incandesce Automations, we are driven by a passion to revolutionize the industrial automation landscape in India. Founded by experienced professionals with deep expertise in electrical engineering and automation, we deliver end-to-end solutions tailored to the needs of modern manufacturing and process industries.*

## Control panel PLC & HMI Programming

- Design and develop PLC logic for industrial automation.
- Troubleshoot and optimize control systems for performance.
- Seamless integration of sensors, actuators, and communication modules.
- Support for leading PLC brands (Siemens, Mitsubishi, Allen-Bradley, etc.).

## SCADA Development

- Real-time monitoring and control of industrial processes.
- Custom SCADA interfaces tailored to client operations.
- Alarm management and event logging systems.
- Data acquisition and historical trends for analysis.

## Custom Machine Building

- End-to-end development of tailor-made industrial machines.
- Precision mechanical, electrical, and software integration.
- Designed to improve productivity and reduce manual intervention.
- Scalable solutions to suit various industrial sectors.

## Automation Support & Service

- On-site and remote troubleshooting support.
- Retrofitting and upgrading of legacy systems.
- Expert consulting for automation optimization.
- Support for automation in greenfield and brownfield projects.
- 24/7 support for critical systems.

## Control Panel Building

- In-house design and assembly of custom control panels.
- Neatly organized wiring and robust construction.
- Built to comply with international safety and electrical standards.
- Testing and quality assurance before delivery.
- Suitable for a wide range of industrial applications.
- Custom layout based on client specifications and equipment requirements.

## Our Vision

To be the most trusted partner in industrial automation, offering cutting-edge solutions that drive efficiency, quality, and growth.

## Our Mission

To provide reliable, innovative, and cost-effective automation solutions,  
To empower industries with smart technologies and seamless support,  
To become a hub for industrial electrical item sales and services
